

The premium aluminium roof bar system for commercial vehicles.

The new generation of commercial vehicles needs the new generation of van accessories. Aerodynamic, stylish and corrosion resistant, KammBar Pro is the leading roof bar of choice for professional van users.

Made from anodised aluminium, KammBar Pro increases the storage capability of any van, while its modern design not only provides great aesthetics but also limits wind noise. With two pairs of load stops supplied as standard, KammBar Pro is the ultimate roof bar system to take your van to the next level.

DIMENSIONS

- Length	(L1)	1240mm - 1420mm - 1600mm - 1700mm
- Leg width	(W1)	133mm
- Cross tube width	(W2)	60mm
- Leg height - to top of the bar	(H1)	109mm
- Leg height- to bottom of the bar	(H2)	71.5mm
- Load stop height	(H3)	102mm

WEIGHT

Bar length	Bar	Combined weight of two legs	Total weight
- 1240mm	1.60 kg	0.76 kg	2.36 kg
- 1420mm	1.83 kg	0.76 kg	2.59 kg
- 1600mm	2.06 kg	0.76 kg	2.82 kg
- 1700mm	2.19 kg	0.76 kg	2.95 kg

MAXIMUM CORROSION RESISTANCE

Manufactured from anodised aluminium to prevent rusting, making the system extremely durable in all weather conditions.

TWO PAIRS OF LOAD STOPS INCLUDED

The final touch to our premium roof bar solution, all KammBar Pro systems come with two pairs of load stops as standard.

EXTREMELY AERODYNAMIC DESIGN

The unique shape of the bar profile is inspired by the work of Professor Wunibald Kamm - a pioneering aerodynamicist who established that a teardrop shape such as this is ideal for reducing drag.

MINIMAL WIND NOISE

The KammBar Pro's aerodynamic shape almost entirely eliminates wind noise.

BESPOKE FITTING

Available in two, three and four bar configurations, the KammBar Pro comes complete with a fitting kit that includes bespoke pads and spacers, tailored to the mounting points of every vehicle.

FAST FITTING WITH PREASSEMBLED LEGS

Supplied with the saddles loosely fastened into place within the legs, allowing for quick and easy fitment.

STYLISH LEG COWLS

The strong steel legs are covered by aesthetic composite covers to add to the modern, premium look of the product.

DURABLE AND BUILT TO LAST

KammBar Pro has been rigorously tested by our inhouse team of design engineers to ensure it is strong and robust enough to withstand the challenges of day-to-day usage.

BEACON BRACKET

This bracket is a beacon support that securely holds single & triple bolt fixing beacons in place, increasing the functionality of the system. Sold separately.

LOCK UPGRADE KITS

Lock kits can be purchased separately to provide additional theft deterrence and security.

SINGLE RETAIL BOX

All KammBar Pro systems are supplied in a single package. This ensures quick and efficient shipping, minimising any risk of delays as opposed to sending multiple packages.

MATERIAL	WHERE USED	ADVANTAGES
Aluminium alloy		
- 6063A T6	- Cross tubes	- Extremely durable, high tensile, yield strength - Excellent weight to strength ratio - Scratch resistant - Great for intricate extrusions with a good surface finish and high corrosion resistance
Composite		
- LDPE - Polypropylene (PPCP)	- Crosstube end cap - Leg cowl	
Mild steel		
- Mild steel HR4, powdercoat textured black	- Bar leg - Bar saddle	- High strength - Corrosion protected - 1000h salt spray tested
Fixings		
- Multi-grip pop rivets (main connection method) - Bolts & (self locking) nuts size M8, combination of stainless and galvanised steel		
Tools required for installation		
- 10mm and 13mm spanner required, allen key (included)		

KammRoller[™]

To complement the KammBar range, we have also redesigned our rear roller system. The new KammRoller, compatible with both Fleet and Pro bars, is now more durable and easier-to-fit than ever before. KammRoller is lighter than its predecessor, with a reduction of up to 30% in weight.

Our design team have managed to reduce the product's weight without compromising on its strength. In fact, thanks to replacing the plastic roller inserts with steel versions, this roller is much more reliable than the old product. Its new aluminium construction fits in seamlessly with both KammBar Pro and KammBar Fleet, as well as with modern commercial vehicles.

Fitting time

FEATURES

- Roller now made from aluminium and considerably lighter
- New support pad fitting, enabling quicker and easier installation
- New steel roller inserts for a more durable design
- 50kg rated
- Rhino branded end caps
- Bespoke fitment for every vehicle

TECHNICAL

Roller length (RL)	Total length (TL)	Support arm length (SL)	Weight
656mm – 816mm – 956mm – 1056mm – 1114mm	804mm – 964mm – 1104mm – 1204mm – 1262mm	225mm – 300mm – 350mm – 430mm – 490mm – 530mm	min 1.28kg / max 2.23kg
